

Fire Forensics Investigation Day 4

October is Fire Prevention Month!
Learn how fires start and spread through
an interactive investigation this week!

1. Select "Solve the Case"

2. Watch the video.

3. Collect Evidence.

Your first solo investigation!

Investigate the burned structure for observable effects of the fire.
Combine your observations to identify a pattern. Patterns of
evidence help you make a claim about the fire's origin.

4. Make your claims.

5. Email to instructor.

When you're done, enter your name here:
